## GCX Worksheet

### Pedals, FX Loop, Amp Channel Switching

This setup uses half the GCX to control 4 pedals running into the front of the amp. A multi-effect rack unit and delay also have their own isolated section of the GCX and are routed into the amp's FX loop. Loops 7 and 8 are combined with an "insert point cable" to switch the amp's Clean, Dirty, and Lead channels.

Functions:

Loop #1	PEDAL #1 ON/OFF	Loop #5	MPX-G2 ON/OFF
Loop #2	PEDAL #2 ON/OFF	Loop #6	DELAY ON/OFF
Loop #3	PEDAL #3 ON/OFF	Loop #7	CLEAN/DIRTY AB
Loop #4	PEDAL #4 ON/OFF	Loop #8	RHYTHM/LEAD SELECT
