GCX Worksheet

Pedal, Tuner, FX Loop, Amp On/Off

This setup uses a seldom understood feature of the GUITAR IN buffer. The output of the buffer not only comes out the rear GUITAR OUT, but also splits to the FEED THRU allowing you to run a tuner at all times. The rig also has a single pedal run in front of the amp, and two units in the amp's FX loop.

Notes:

- | | | | |
|---------|-----------------|---------|-------|
| Loop #1 | EQ ON/OFF | Loop #5 | _____ |
| Loop #2 | MARSHALL ON/OFF | Loop #6 | _____ |
| Loop #3 | EXCITER ON/OFF | Loop #7 | _____ |
| Loop #4 | PROPHECY ON/OFF | Loop #8 | _____ |
