## GCX Worksheet

### Multiple Preamps, Stereo Loops, Stereo Power Amp

Using the GUITAR IN buffer's two outputs (GUITAR OUT & FEED THRU), the signal is split to the JMP-1, and splits again to feed the TriAxis preamp and a Lexicon device. Another special feature of this rig are the discreet stereo loops used for the MPX-1 and Intellifex units.

Functions:

- |         |                                   |         |                       |
|---------|-----------------------------------|---------|-----------------------|
| Loop #1 | JMP-1/TRIAXIS A/B                 | Loop #5 |                       |
| Loop #2 | JMP-1 OR TRIAXIS/LEXICON A/B      | Loop #6 | BBE ON/OFF            |
| Loop #3 | MPX-1 (R) ON/OFF SWITCH WITH      | Loop #7 | MPX-1 (L) ON/OFF      |
| Loop #4 | INTELIFFEX (R) ON/OFF SWITCH WITH | Loop #8 | INTELIFFEX (L) ON/OFF |
