GCX Worksheet

Magnetic and Piezo Guitar Rig

This GCX rig is actually controlling three different audio paths. Loops 1 and 2 are only used on the guitar's standard magnetic pickups. Loops 5 and 6 are only on the piezo bridge pickups output. A small mixer is used to combine the signals back together and then loops 3, 4, 7, and 8 are used on the final summed signal before going to the amp.

Functions:

- | | | | |
|---------|--------------------------------|---------|--------------------------------|
| Loop #1 | MAG ONLY EFFECT #1 ON/OFF | Loop #5 | PIEZO ONLY EFFECT #1 ON/OFF |
| Loop #2 | MAG ONLY EFFECT #2 ON/OFF | Loop #6 | PIEZO ONLY EFFECT #2 ON/OFF |
| Loop #3 | MAG/PIEZO/MIX EFFECT #1 ON/OFF | Loop #7 | MAG/PIEZO/MIX EFFECT #3 ON/OFF |
| Loop #4 | MAG/PIEZO/MIX EFFECT #2 ON/OFF | Loop #8 | MAG/PIEZO/MIX EFFECT #4 ON/OFF |
