

Product Profile

Dingbat® PX Pedalboard Power Package with PX-8 PLUS & Pedal Power® 4X4

DINGBAT® SERIES OVERVIEW

Designed for seamless integration with industry-standard Voodoo Lab® Pedal Power®, the innovative patented Dingbat pedalboard delivers a rugged, lightweight platform for organizing pedals and keeping cables neatly tucked away and out of view. Each Dingbat is crafted in the USA from superior 6061-T6 aircraft-grade aluminum and includes a heavy-duty tour-ready gig bag.

PRODUCT OVERVIEW

The Dingbat® PX 4X4 Power Package includes onboard true bypass pedal switching and a factory-installed Pedal Power® 4X4. Its innovative patented design places the switcher beneath the foot of the board keeping all cabling neatly out of view and preserving maximum space for pedals. Dingbat PX also features a dedicated position for a second Pedal Power that can be quickly installed with optional mounting brackets if more power is needed. Hook-and-loop tape is provided to attach pedals, as well as zip ties and 4-way tie mounts to secure cabling underneath.

INTEGRATED TRUE BYPASS PEDAL SWITCHING

Dingbat PX features an onboard PX-8 PLUS pedal switcher equipped with 8 true-bypass audio loops and 8 premium quality silent-operation footswitches. Simple and intuitive programming allows instant access to 36 user-created preset loop combinations at the touch of a single button. PX-8 PLUS can also function as a simple strip to turn on and off individual loops. In addition to the 8 audio loops, PX-8 PLUS includes a loop insert point between loops 6 and 7. This insert point is ideal for placing a volume pedal or other audio device into the signal path.

POWER SUPPLY

Pedal Power® 4X4 is equipped with 8 noise-free isolated outputs that will bring out the best tone and performance from your pedals. With four 9V 400mA outputs and four 9V 100mA outputs, Pedal Power 4X4 is ready to power anything from standard battery-powered stompboxes to modern high current DSP effects like Strymon, Eventide, Line 6, and TC Electronics. Two of 4X4's 400mA outputs include a second port for pedals requiring 12V. Combine isolated outputs with Voodoo Lab Doubler Cables for 18V or 24V operation or to reach currents of up to 800mA (cables sold separately).

GIG BAG

Each Dingbat PX pedalboard includes a heavy-duty tour grade padded gig bag featuring shoulder and backpack straps for easy transportation and premium materials, like YKK zipper hardware, to ensure long-lasting protection for your board and pedals.

Product Profile

Dingbat® PX Pedalboard Power Package with PX-8 PLUS & Pedal Power® 4X4

Short Description

The Dingbat® PX 4X4 Power Package includes onboard true bypass pedal switching to access 36 preset effect combinations. The factory-installed Pedal Power® 4X4 is equipped with 8 noise-free isolated outputs that will bring out the best performance in both standard battery-powered and high current effects. Each Dingbat Power Package includes power cables, pedal mounting accessories, and a heavy-duty tour grade padded gig bag. Pedalboard surface size: 22" x 13". Made in the USA.

FEATURES & SPECIFICATIONS

- Innovative patented design
- Crafted from lightweight 6061-T6 aircraft-grade aluminum
- Integrated Voodoo Lab PX-8 PLUS True Bypass Programmable Pedal Switcher
- Single-button access to 36 preset effect combinations and 128 presets via MIDI
- Factory-installed Pedal Power 4X4 8 isolated output power supply
- Pedalboard surface size: 22" x 13" (559mm x 337mm)
- Pedalboard size with switcher: 22" x 16" (559mm x 406mm)
- Pedalboard weight with switcher and power supply: 8.45 lbs. (3.84 kg)
- Additional slot under pedalboard for mounting second Pedal Power unit
- Adhesive-backed hook-and-loop pedal mounting tape
- UV-resistant cable ties and 4-way tie mounts
- Professional tour grade padded gig bag with premium YKK zipper hardware
- Gig bag dimensions and weight: 25" x 18.5" x 7" (635" x 470 x 178mm)/ 3.6 lbs. (1.63 kg)
- Made in the U.S.A.
