

Product Profile

## **Giggity®** **Analog Preamp + Boost**

### **PRODUCT OVERVIEW**

Giggity is a powerful and versatile tone shaping tool that brings out the best in any guitar and amp. The 4-position Sun/Moon preamp voicing selector offers a distinctive pallet of tones ranging from brilliant sparkling detail to warm and harmonically rich. Fine-tuning the sonic character is easy and intuitive using the Body and Air controls. Dial in Body to add thickness and tighten the low-end. Add Air to bring out the high-end shimmer and detail in your guitar's pickups. Each Giggity is handmade in the U.S.A using only premium components and features silent, true bypass switching.

### **CONTROLS**

- **LOUDNESS:** Sets the input gain for Giggity's preamp section. Use low settings for clean sounds, or turn it all the way up for a little grit and compression.
- **SUN/MOON SELECTOR:** 4-position control that selects the overall gain structure and voicing of Giggity's preamp section. SUN adds shimmering high-end. MOON adds weight and warmth.
- **BODY:** Boosts or cuts the lower midrange/upper bass frequencies of your signal. With the knob at 12 o'clock (which is equal to 0dB of cut or boost), turn it clockwise to add Body. Turning the knob counter-clockwise cuts the Body frequencies
- **AIR:** Boosts or cuts the higher treble frequencies of your signal. With the knob at 12 o'clock (which is equal to 0dB of cut or boost), turn it clockwise to add shimmer and presence. Turning the knob counter-clockwise cuts the Air frequencies.
- **MASTER:** Sets the overall output level.
