

Product Profile

## Micro Vibe

### PRODUCT OVERVIEW

The Voodoo Lab® Micro Vibe delivers the same juicy, swinging tone as an original 1968 Uni-Vibe.\* Designed as a Leslie® rotating speaker simulator, the original Uni-Vibe circuit is a variation of a four-stage phase shifter. While it didn't do so well with keyboard players, its unique sound achieved legendary status when Jimi Hendrix used the effect on his Band of Gypsys record, and his landmark Woodstock performance of "The Star Spangled Banner." Numerous recordings by guitar heroes like Robin Trower, David Gilmour, and Stevie Ray Vaughan also helped make the Uni-Vibe a tone classic.

Micro Vibe includes the same sinewave oscillator, incandescent lamp, and photocells, which give the original Uni-Vibe its groovy swagger. Thanks to Voodoo Lab's dedicated, guitar playing engineers, our Micro Vibe gives you the same lush, psychedelic colors of the original, but in an ultra-compact, pedalboard friendly 9V stompbox!

### CLASSIC SETTINGS

- **Elementary Psychedelic:** Set the Intensity at about 4:00 and the Speed around half or a little more. In general, as you increase the speed you should decrease the intensity.
- **Leslie Speaker:** Set the Intensity around half and the Speed all the way up.

Product Profile

## Micro Vibe

### Short Description

Countless recordings by guitar heroes like Jimi Hendrix, Robin Trower, David Gilmour, and Stevie Ray Vaughan helped make the Uni-Vibe a tone classic. The Voodoo Lab Micro Vibe delivers the same lush, psychedelic colors of the original Uni-Vibe, but in an ultra-compact, pedalboard friendly stompbox. True bypass switching. Made in the USA.
