

Pedal Power® X4 Isolated Power Supply

Product Profile

PRODUCT OVERVIEW

Pedal Power® X4 is a professional isolated power supply for both battery-operated and high current DSP effects. Its ultra-compact size fits even the smallest pedalboards—including Voodoo Lab Dingbat TINY and Pedaltrain® Nano—and operates at any mains voltage for international touring. X4's innovative hybrid DC transformer design incorporates exotic components, linear regulation, and computer-optimized filtering to establish industry-leading audiophile quality power that unveils the hidden sonic potential of your rig.

Pedal Power X4 also shines as a supplementary power supply in an expanding rig. Powering directly from a Pedal Power 3 X-Link expansion port or any 12V 400mA DC output, X4 adds four isolated outputs to an existing Voodoo Lab power supply. X4 can also power from the AC courtesy outlet of a Pedal Power 2 PLUS, significantly upgrading both its isolated output capacity and high current capability.
