

Product Profile

Ground Control Pro

MIDI Foot Controller

PRODUCT OVERVIEW

Imagine being able to instantly reconfigure your entire rig with the touch of a single button. Now you can! And, you aren't limited to just MIDI processors. With the addition of a GCX Guitar Audio Switcher, you can also control all your stompbox and rack effects, select amp channels, and more.

The Voodoo Lab® Ground Control Pro can simultaneously control up to 8 different MIDI devices, each on their own channel. And, you can assign 8 of its buttons for instant access of GCX loops and processor functions. This gives you stompbox style control over your processor or modeling amp's internal effects.

The finest full-featured MIDI foot controller available, the Ground Control Pro is compatible with all MIDI controlled devices, and delivers the flexibility, ease-of-use, and rugged reliability necessary to meet the needs of the most demanding professional players.

Whether you are controlling a refrigerator sized rack, using a modeling amp, or just a single processor, the Ground Control Pro is the perfect choice for all of your performance needs.
