

Product Profile

Pedal Power® ISO 5

PRODUCT CATEGORY OVERVIEW

Great tone begins with clean, isolated power and nothing delivers it better than Voodoo Lab Pedal Power. Designed to meet the needs of professional users, Pedal Power will provide clean, consistent power, even with the poor AC line conditions often found on stage. Completely isolated, filtered, and regulated output sections eliminate ground loops and unwanted interactions between effects, resulting in lower noise and noticeably improved tone. Among artists, guitar techs, and rig builders, Voodoo Lab is the most trusted brand worldwide for reliable, noise-free power. Pedal Power simply makes you sound better.

PRODUCT OVERVIEW

Pedal Power ISO-5 is a compact linear power supply that delivers world-class performance anchoring small pedalboards or serving as a supplemental power supply in larger rigs. ISO-5 is equipped with five noise-free isolated outputs that will bring out the best tone from your pedals. With three 9V 100mA outputs, one 400mA paired output with ports for 9V or 12V effects, and one 18V 100mA output, ISO-5 is a versatile small supply capable of tackling a wide variety of pedal powering demands.

ELEMENTS OF A GREAT POWER SUPPLY

Isolation

Ground loops cause hum and the solution is to break the unwanted ground path. Isolation is the best way to do it. Unlike many power supplies, Pedal Power isolates every output. This eliminates tone-robbing interaction between other effects. Pedal Power runs everything from vintage overdrives to modern digital marvels in a way other power supplies simply can't.

Proprietary Balanced Transformer

Typical transformers, like those used in a wall wart, create large magnetic fields that cause hum in any audio path near it. Pedal Power uses a custom-designed, ultra-low noise toroidal transformer with separate balanced windings for every output allowing even the most sensitive pedals to be dead quiet.

Linear Power

What's good for charging a cell phone is NOT good for your pedals. While digital switching power supplies are small and inexpensive, they also generate noise. Pedal Power uses an audiophile quality linear supply for consistently stable, clean, pure power.

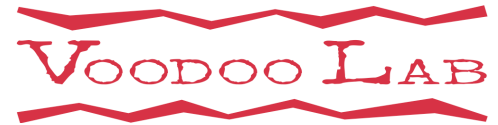

PEDAL POWER ISO-5 OUTPUT FEATURES

9V 100mA Outputs (x3) Outputs for powering standard 9V battery-powered effects.

9V/12V 400mA Paired Output (x1)

Available for powering high current digital effects, this paired output offers the option of either 9V or 12V isolated operation. Standard battery-powered effects can also be powered using this output.

18V 100mA Output (x1) Output for powering 18V battery-powered effects.

Product Profile

Pedal Power® ISO 5

Short Description

Pedal Power ISO-5 is ideal for use with a small pedalboard or as a second power supply for larger rigs. Reliable, quiet, and powerful, ISO-5 features five completely isolated outputs, including three 9V standard outputs, one 400mA paired out with 9V and 12V options, and one 18V out. Power cables included.

FEATURES & SPECIFICATIONS

- 5 total isolated outputs
- Three (3) 9V 100mA outputs
- One (1) Paired 400mA output with 9V/12V options
- One (1) 18V 100mA outputs
- Linear regulation and toroidal transformer for lowest possible noise
- Delivers clean, consistent power even with poor AC line conditions
- Includes DC power cable kit and detachable AC line cable
- Product Dimensions: 4.9" wide x 3.4" deep x 1.75" tall (124 x 86 x 44 mm)
- Product Weight: 1.24 lbs. (562g)
- Designed and assembled in the U.S.A.
- 5-year warranty*

Model Description: Pedal Power ISO-5 Isolated Power Supply

Model Number: PI

UPC: 813140001222

**Warranty for North America only. Other regions contact your country's distributor for warranty info.*
