

Product Profile

PX-8 PLUS True Bypass Programmable Pedal Switcher

OVERVIEW

The Voodoo Lab® PX-8 PLUS is a MIDI-capable, programmable 8-loop audio switcher that provides total control over guitar pedalboards. It's basic function as an exceptional quality true-bypass loop strip removes unused cabling and connections from the signal path for noticeably improved tone and dynamics. With single-button access to preset loop combinations, the PX-8 PLUS makes simultaneous switching of multiple effects quick and easy.

ORGANIZE AND CONTROL YOUR EFFECTS

With 8 true-bypass audio loops and 8 premium quality silent-operation footswitches, the PX-8 PLUS enables instant access to effects without touching your pedals. Simple and intuitive programming allows instant access to 36 user-created preset loop combinations at the touch of a single button. If preset combinations are not needed, PX-8 PLUS can also function as a simple strip to turn on and off individual loops. In addition to the 8 audio loops, PX-8 PLUS includes a loop insert point between loops 6 and 7. This insert point is ideal for placing a volume pedal or other audio device into the signal path.

PRESERVE YOUR TONE

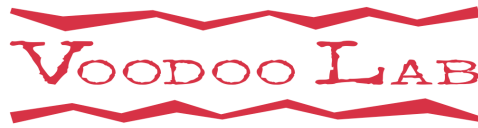

Each audio loop of PX-8 PLUS is true bypass, isolating each effect and keeping unused pedals completely out of the signal path. The result is the quietest, purest tone possible. Noise-free switching between effects and presets is made possible with Voodoo Lab Quiet Switching technology and nitrogen-sealed gold-contact relays. The audiophile-quality output buffer of the PX-8 PLUS ensures your tone will be preserved even with long cable runs to your amplifier.

PERFORM WITH CONFIDENCE

PX-8 PLUS is hand-built in the USA using only the highest quality components and materials. It is engineered for trouble-free operation night in and night out under the most rigorous touring conditions.

A COMPLETE PEDAL MANAGEMENT SOLUTION

PX-8 PLUS is also available as part of Voodoo Lab's innovative Dingbat PX pedalboard. The unique integration of PX-8 PLUS into the Dingbat PX places the switcher and all cabling beneath the board. This patent-pending design preserves every inch of the pedalboard's surface for pedals. As with all Dingbat Pedalboards, installing a Voodoo Lab power supply in a Dingbat PX requires only a screwdriver. Dingbat PX pedalboards are also available in Power Packages with factory-installed Pedal Power.

Product Profile

PX-8 PLUS True Bypass Programmable Pedal Switcher

Short Description

The Voodoo Lab PX-8 PLUS is a programmable 8-loop audio switcher that makes simultaneous switching of multiple effects quick and easy. Access 36 user-created preset audio loop combinations and 128 MIDI presets instantly at the touch of a button. Each audio loop is true bypass and features Quiet Switching™ technology to ensure in the quietest, purest tone possible. Hand-built in the USA.

FEATURES & SPECIFICATIONS

- 8 independent true bypass audio loops using the finest gold contact relays
- 36 user-created preset effect combinations
- Sends MIDI program change messages for selecting presets on MIDI-capable devices
- Loop Strip function available to allow simple direct pedal switching
- Insert point between loops 6 & 7 for volume pedals and more
- Audiophile-quality output buffer preserves tone even with long cable run to amp
- Quiet Switching™ technology for lowest possible noise
- Conveniently power from any Pedal Power 9VDC output
- Instantly recall 128 preset combinations of effects via MIDI
- Compatible with Ground Control Pro or any MIDI controller
- Legendary Voodoo Lab quality and reliability
- Product Dimensions: 21.5" wide x 3" deep x 2" tall (546 x 76 x 51 mm)
- Product Weight: 2.25 lbs. (1 kg)
- Designed and assembled in the U.S.A.
- 5-year warranty*
