

Product Profile

Sparkle Drive

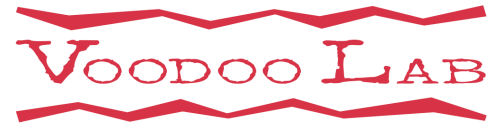

PRODUCT OVERVIEW

Voodoo Lab® Sparkle Drive is an overdrive pedal featuring a unique CLEAN control. Its overdrive circuit provides the same tone as a vintage '808. Then the clean control blends back in a boosted direct signal. This restores the attack and feel which is lost in a highly compressed overdrive circuit. The Sparkle Drive utilizes the same concept as layering two amps, one clean and the other saturated. Of course, with the clean control turned down, you get a classic overdrive tone. All the way up, it provides a super transparent, 100% clean boost.

And just like every Voodoo Lab pedal effect, the Sparkle Drive is hand-built from the finest components available and features true bypass switching, a heavy-duty metal switch, and on/off status LED.

CONTROLS

- **GAIN** - This sets the gain level for the overdrive sound only. It has no effect on the “clean” signal. Use low settings to warm up and compress your tone. Turn it up for additional sustain and saturation.
- **TONE** - Turn it up for a brighter sound, down for darker. It is for the overdrive only and has no effect on the “clean” signal.
- **CLEAN** - Blends the boosted clean signal with the overdrive. All the way down is overdrive only. All the way up is clean only. In between is a blend of both clean and overdrive.
- **VOLUME** - Sets the output level.

Product Profile

Sparkle Drive

Short Description

Voodoo Lab Sparkle Drive overdrive circuit provides the same tone as a vintage '808. It features a unique CLEAN control to blend the overdriven and clean boosted signal, restoring the attack and feel which lost in a highly compressed overdrive circuit. True bypass switching.

FEATURES & SPECIFICATIONS

- Overdrive circuit delivers vintage 808 sounds
- CLEAN control for blending in boosted direct signal
- Create multiple, layered amp sounds - one clean, one overdriven
- True Bypass switching via High Reliability Gold-Contact Relay
- Product dimensions: 4.75" x 3.75" x 2" (121 x 95 x 51mm)
- Product weight: 0.85 lbs. (0.39kg)
- Power requirements: 9V DC 20mA
- Power input type: 5.5mm x 2.1mm barrel connector, center negative polarity
- Designed and assembled in the U.S.A.
- 5-year warranty*

Model Description: Sparkle Drive

Model Number: VD

UPC: 813140001031

**Warranty for North America only. Other regions contact your country's distributor for warranty info.*
